## **ASSISTED LIVING OF ARIZONA, LLC ANNOUNCES GROUND BREAKING FOR HERITAGE VILLAGE ASSISTED LIVING**

MESA, AZ -- After nearly five years of planning and design Heritage Village Assisted Living has commenced construction of phase one with three additional phases planned over the next two years. Located on a five acre parcel on the southwest corner of Brown Road and the 202 Freeway in northeast Mesa, the community will consist of eight single level luxury homes and one medical office building.

“Each home will accommodate 20 residents,” said Stan Hosac responsible for Management/Operations for Heritage Village Assisted Living. “The office building located at the entrance has been designed to accommodate those businesses that offer services to our aging population. When completed, the community will be home to 160 residents.”

Hosac has thirty years of experience as an owner of assisted living communities and is a nationally recognized consultant and pioneer of assisted living. Hosac will provide management services for the community. Also involved in the project is Gary Crosby, a local builder/developer who owns Heritage Village Assisted Living.

“Mr. Crosby has thirty years of experience in commercial and residential construction and development, and specializes in developing Assisted Living communities. Our combined abilities and talents have created the most remarkable Assisted Living community in the nation,” said Hosac.

Heritage Village Assisted Living is a unique campus/community setting. Although emphasis will be on providing assisted living for our aging population with specific needs such as, dementia, Alzheimer’s and hospice, other unique services are planned for the community as well.

“Individualized homes within our community give us the unique opportunity to designate homes for any age group with those suffering from latent stages of disease such as Parkinson’s, multiple sclerosis, Lou Gehrig’s and diabetes,” said Hosac. “Traumatic Brain Injury [TBI], including individuals who are developmentally disabled will also be welcomed into our community along with those needing respite care and surgical recovery care.”

Each luxury home in Heritage Village Assisted Living is approximately 6,500 square feet with individual private rooms and bathrooms for each resident. The home-like environment includes three delicious home-cooked meals per day as well as numerous planned activities and individual specialized care.

“Planned memorabilia from the 1940s and 1950s will be featured in each home to provide a unique setting for residents to enjoy,” said Crosby. “We will take our residents back in time to memories of their prime years. Fruit trees of numerous varieties along with raised gardens are provided and specifically designed for our residents to participate in and enjoy. There is no other community within the United States as unique and inviting as ours.”
